

Software Engineer - Intern

Want to make mobile apps that touch the lives of millions of people? Does the idea of working closely with a team of experienced engineers and building world-class mobile experiences excite you? Think you can thrive in a fast-paced startup located in the heart of San Francisco? If you answered 'yes' to all these questions, keep reading!

We are a new, well-funded startup that is looking for a few rockstar individuals to join us as Mobile Software Engineer Interns in our new digs in San Francisco. While still in stealth mode, we can share that we are backed by an array of impressive investors, and founded by a passionate and experienced team.

Our ideal candidate loves to work in teams yet is an independent self-starter, and is a perfectionist at heart that wants to release and iterate great products quickly. As a software engineering intern, you will work side-by-side with designers and engineers to design, develop and optimize engaging applications for mobile and web. If you thrive in a collaborative start-up environment and would enjoy spending time building great user experiences, we'd love to hear from you.

Qualifications:

- Experience with Object Oriented Programming
- Knowledge of web and/or mobile development techniques
- Strong desire to learn new technologies and techniques
- Currently working towards a degree in Computer Science or related field
- Cool side projects are a major plus

If this sounds like you, please email your resume and any previous cool engineering projects to jobs@rumpus.com.
